Maximizing business value through risk management

AREAS OF INTEREST

PROCEMIN

- New mineral processing technologies
- Modeling, design, optimization, and control of mineral processing
- Comminution: crushing, SAG, HPGR, ball and ultrafine grinding
- Classification, screening, and mineral sorting
- Flotation: fundamentals, reagents, and industrial applications
- Solid-liquid separation
- Processing of precious metals, industrial minerals, and ferrous minerals
- Expansions and new projects
- Plant operation and management
- Mineral economics, tailings reprocessing, and materials recycling
- Advanced process control and expert systems

GEOMET

- Applied mineralogy mineral characterization
- Sampling and sensors
- Testing and prediction of metallurgical parameters: crushing, grinding, flotation, concentration, sedimentation, filtration, and environmental performance
- Geometallurgical modeling
- Geometallurgical applications in production planning
- Metallurgical balancing and reconciliation
- Case studies and industrial practices
- New technologies and methodologies for geometallurgical model development

ARTICLES SUBMISSION

We invite professionals and academics to submit an article of their work in English, 3 to 6 pages, by March 5, 2027.

Articles should be uploaded using the [Authors Form](#) available at the conference website.

Executive Committee

CHAIR 2026

Marcelo Rodríguez

Metallurgy and Process Control
Manager, Cía. Minera Doña Inés
de Collahuasi, Chile

PROGRAM DIRECTOR

Magín Torres

Metallurgy and Engineering
Manager, Minera Altair, Chile

EXECUTIVE DIRECTOR

Carlos Barahona

General Manager,
Gecamin, Chile
