

Poster preparation guide

The poster sessions will take place on **Wednesday, 21 November** and **Thursday, 22 November**.

To participate in the poster sessions, authors must present a poster summarising the essentials of their project. Posters should focus on visual aspects rather than text. Posters should reflect technical/scientific contributions and should not be an advertisement for a product or service.

Posters should be composed of **one large sheet** and should be prepared in **English** or **Spanish**. All figures and tables must also be properly translated into English.

During the poster session, each author must remain with his/her poster in order to answer questions from the seminar delegates.

Please bear in mind printed posters must arrive at our office **by 12 November and not afterwards**.

Poster must be sent to Soledad Cassini to Paseo Bulnes 197, 6th floor, Santiago, Chile.

Important: Posters will not be retained after the event. Those authors interested in keeping their posters must ask the congress coordination for them after the last poster session.

Poster specifications

- **Poster size:** 810 mm × 1188 mm (A0 format, portrait layout)
- **Language:** English or Spanish
- **Minimum paper weight:** 140 g/m²
- **Paper finish:** Thermo-laminated
- **Printing:** Poster should be printed on high quality paper with photos in high resolution if used.
- **Title:** Poster should include a title in **Arial** font, size **90 pt, left aligned, 5 cm margin**, with **“minimum” line spacing**. (“Minimum” is one of the paragraph formatting preferences that can be chosen when creating a Word document. It is more than single space but less than 1.5.)

The author’s name, company and country should be included under the poster title in size **50 pt**.

Example: John Smith, TEC Engineering, Australia

- *In case of **multiple authors**, please follow this example:*
John Smith, TEC Engineering, Australia; Mike Wilson, SRK Consulting, Canada; Juan González, Los Pelambres Mine, Chile
- *In case of **multiple authors from the same company**, please follow this example:*
John Smith and Mike Wilson, TEC Engineering, Australia
